

INDUSTRIAL AUTOMATION
PROCESSING EQUIPMENT

**DESIGN, MANUFACTURE AND CONTROL OF PROCESSES, LINES,
PURPOSE-MADE MACHINES, SYSTEMS AND DEVICES IN INDUSTRY**

- METAL AND ELECTRICAL PROCESSING INDUSTRY
- METALLURGICAL INDUSTRY
- WOOD INDUSTRY
- FOOD INDUSTRY
- PHARMACEUTICAL INDUSTRY
- PAPER AND TEXTILE INDUSTRY
- AUTOMOTIVE INDUSTRY
- RUBBER INDUSTRY

Implementation from the idea to handover - "turn-key basis"

Control and management of processes in production

Transport and handling (conveyors – belt, roller, chain; turntables, cranes,...)

Robotisation

Electrical and mechanical reconstruction of the existing devices and systems

Feeding systems, mixing and filling, reservoirs

Steel constructions, platforms, overhanging roofs, storage and transport racks

Anti-noise, command and classical protective cabins

Equipment maintenance

Design-type built-in equipment by Siemens and Schneider or as desired by the client

INOX solutions for special environments
